

I am concerned about the possible effects of Low Power FM stations in regards to my favorite radio station, Air One FM. Air One is a Christian broadcaster that has a positive effect on myself and my community. If a LPFM station interferes with their broadcast, this could have negative effect on my community as it would interfere with the good work Air One is accomplishing. As you, and Chairman Powell are well aware of, we have WAY TOO MANY Howard Stern and Janet Jackson type individuals in our society today already. Quite frankly, wouldn't it be nicer to have more positive influences in America, instead of continuing to spread trash that you have to regulate and fine for indecency?

Thank you.
